Factory

Fondata nel 1925 come "Alluminio Paderno" e specializzata nella produzione di pentole in alluminio per il settore casalingo, Paderno è attualmente un marchio leader a livello mondiale nella fabbricazione e commercializzazione di pentolame professionale e articoli da cucina per la ristorazione e per l'industria dell'ospitalità.

Nel 1997, in seguito all'acquisizione di Sambonet da parte di Paderno s.r.l. nasce Sambonet Paderno Industrie S.p.A.. Sambonet rappresenta dalla metà dell'ottocento l'eccellenza italiana, a livello internazionale, nella produzione di posateria e vasellame argentato e in acciaio inox dagli stili più classici fino alle sperimentazioni di design.

Paderno e Sambonet approdano nel 2001 a Orfengo (Novara), costituendo il proprio quartier generale in un nuovo e moderno stabilimento firmato dall'Architetto Enrico Frigerio. Nell'azienda si concentrano non solo le attività produttive, il magazzino, un moderno laboratorio, ma anche gli uffici, lo showroom, l'outlet e un'area ricreativa dedicata ai dipendenti. Nel 2009, con l'acquisto della prestigiosa società tedesca Rosenthal, Sambonet Paderno Industrie S.p.A. arricchisce il proprio portafoglio marchi (Sambonet, Paderno e Arthur Krupp) integrandolo con prestigiosi brand tedeschi del settore della porcellana come Rosenthal, Thomas e Hutschenreuther e, nel 2013, Arzberg. Il Gruppo italiano si completa nel 2015 con Ercuis - prestigiosa argenteria francese - e la nota azienda produttrice di porcellana di Limoges Raynaud, del quale possiede il 55% delle quote. Forte della propria offerta e leader nella produzione di articoli di design d'alta qualità per la tavola e la cucina, Arcturus Group è oggi in grado di soddisfare tutte le esigenze dei canali Ho.Re.Ca, contract e dettaglio.

I prodotti Paderno sono distribuiti attraverso rivenditori specializzati in tutti i comparti della ristorazione (come ristoranti, fastfood, alberghi e comunità, ospedali, navi da crociera ed enti militari). Grazie a oltre 90 anni di storia e della presenza capillare in tutto il mondo, Paderno si propone internazionalmente come un punto di riferimento indispensabile per tutti i professionisti della ristorazione. Gli articoli di produzione sono inoltre affiancati da un'importante gamma di prodotti complementari e affini accuratamente selezionati e realizzati da ditte altamente qualificate.

Founded in 1925 under the name of "Alluminio Paderno" and specialised in the production of aluminium pots and pans for the household, today Paderno is a leading international brand in the manufacture and sale of professional cookware and kitchen items for the restaurant and hospitality industry.

The 1997 saw the set-up of Sambonet Paderno Industrie S.p.A., following the acquisition of Sambonet by Paderno s.r.l.. Since the mid-nineteenth century, Sambonet has been a standard-bearer for Italian excellence throughout the world, producing flatware and holloware in silver-plated and stainless steel, from a classic to a modern and design-driven style. In 2001, Paderno and Sambonet arrived in Orfengo (Novara), where the headquarters of the Group were set up in a new and modern plant designed by architect Enrico Frigerio. This facility houses not only the factory, the warehouse and a modern laboratory, but also the showroom, the outlet store and a recreation area for staff.

In 2009, the acquisition of the prestigious German company Rosenthal allowed Sambonet Paderno Industrie S.p.A. to enhance its brand portfolio (Sambonet, Paderno and Arthur Krupp) with the addition of leading names in the porcelain sector, including Rosenthal, Thomas and Hutschenreuther, in 2013, Arzberg. In 2015, the Italian Group acquires Ercuis - prestigious french silverware industry - and Raynaud, famous Limoges porcelain producer, of which it owns the 55% of the share. AL SERVIZIO DELLA CUCINA SENZA GLUTINE

PADERNO[®]

WORLD CUISINE

Coerentemente all'ottica di servizio che contraddistingue da sempre il marchio, Paderno propone una linea completa di articoli e strumenti professionali facilmente identificabili in cucina, in grado di abbattere eventuali errori durante il loro utilizzo a salvaguardia del cliente celiaco e di tutti gli intolleranti. Sviluppato e concretizzato nel 2013 in collaborazione con l'Associazione Italiana Celiachia Lombardia ONLUS, questo progetto colloca Sambonet Paderno Industrie come prima azienda del settore a offrire al canale Ho.Re.Ca una linea completa di articoli da destinare alla preparazione di pietanze senza glutine.

Attraverso alcuni elementi distintivi e differenzianti, come manici in PVD oro per pentole e padelle e personalizzazione con un logo specifico per utensili, tutti gli strumenti saranno facilmente identificabili in cucina. Questa gamma contribuisce a:

- Diminuire il rischio di accidentali contaminazioni crociate degli alimenti;
- Facilitare il professionista nell'operare e nell'offrire un servizio a favore del cliente con intolleranze alimentari;
- Sensibilizzare il settore sul tema "gluten free" di fronte alle nuove esigenze dei consumatori.

Consistently with the functional approach, which has always marked the brand, Paderno offers a complete product line and professional tools, easily recognizable in the kitchen, which can reduce possible mistakes during their use to protect people affected by celiac disease. Developed and realized in 2013 in collaboration with Associazione Italiana Celiachia Lombardia ONLUS (Italian Society for the Celiac Disease – Lombardy Section), this project makes Sambonet Paderno Industrie S.p.A. the first company in its market that offers to the HoReCa channel a complete line of items intended for gluten-free cooking.

Some distinguished special features, such as golden PVD handles for pans and pots and a special customised logo for utensils, will allow professionals to easily identify all these items in the kitchen.

This product line aims at:

- Reducing the risk of accidental food cross-contamination;
- Making it easier for professionals to work and provide services to clients with food intolerances;
- Raising awareness on the gluten-free diet issue in the industry so as to respond to the new needs of consumers.

PADELLE FERRO STEEL FRYING PANS

**INDUCTION
READY!**

Il ferro è ottimo per le cotture a fuoco molto vivo perché, non avendo un'alta capacità di trasmettere calore, evita improvvisi sbalzi di temperatura. Essendo un materiale antiaderente, evita l'attaccamento dei cibi. Sopporta temperature elevatissime e col tempo migliora il suo rendimento. I recipienti in ferro sono i più adatti per frittture, omelette o sottili crêpes. La padella in ferro nera va lavata con acqua il meno possibile e mantenuta sempre unta. Il ferro è il materiale ideale anche per cotture a induzione.

Iron is ideal for cooking at high temperatures because its low capacity of heat transmission prevents temperature leaps. As it is non-stick, food does not stick to it. It withstands very high temperatures and improves its performance with use. Iron pans are perfect for fried food, omelettes or fine crêpes. Wash the black iron pan in water as little as possible and always keep it greased. Iron pans are ideal also for cooking on induction hobs.

GHISA SMALTATA ENAMELLED CAST IRON

 INDUCTION
READY!

SLOWCOOKING-FAST GRILLING-COOK & SERVE

Idonee all'uso su tutte le fonti di cottura (gas, elettriche, vetroceramica, induzione) e forni (gas, petrolio, carbone o legna) ad esclusione di microonde. Una perfetta armonia tra ghisa, smalto e alta qualità. Progettate e costruite per assorbire e diffondere il calore in modo uniforme. La ghisa è adatta a tutte le tecniche di cottura, per zuppe, arrostiti, risotti, dolci, per piatti che richiedono una lunga cottura tipo brasati e allo stesso modo ideale per carni e verdure alla griglia in quanto ne esalta sapori ed aromi in stile barbecue. La ghisa ha anche caratteristiche di antiaderenza. La temperatura elevata della padella cauterizza la superficie della carne. Tutto il sapore, l'acqua e i valori nutrizionali rimangono sigillati nel cibo. Nella cottura in casseruole, il vapore generato grazie al particolare design del coperchio si condensa ricadendo e mescolandosi nuovamente nel cibo non solo trattenendo sapori e aromi ma fornendo la miglior protezione alle sostanze nutrienti e contribuendo ad una dieta sana. La ghisa è un materiale riciclabile al 100% e quindi ecologico. Inoltre, grazie alla sua capacità di mantenere il calore per lungo tempo consente un notevole risparmio di energia permettendo di cuocere a fuoco basso. Anche a tavola mantengono in cibi in temperatura. La ghisa mantiene però il caldo come pure il freddo... può essere usata per mantenere il cibo fresco. Riposta per un breve periodo in frigorifero, mantiene il cibo fresco nelle calde giornate estive e ideale per servire insalate di pasta, riso, farro, ecc., ecc. Pratica e facile da pulire. Queste casseruole e padelle in ghisa sono lavabili in lavastoviglie, per merito della speciale tecnologia applicata al metodo di smaltatura. Manicatura e pomoli dal design ergonomico sono in ghisa e inox. Durante la cottura si raccomanda di maneggiare con un panno consistente e asciutto per evitare di scottarsi.

Suitable for use on all cooking hobs (gas, electric, ceramic, induction) and ovens (gas, oil, coal or wood) except microwave. A perfect harmony of cast iron, enamel and high quality. Designed and constructed to absorb and spread the heat evenly. Cast iron is suitable for all cooking techniques, for soups, roasts, rice, desserts, for braise that require a long cooking and likewise ideal for meats and grilled vegetables as it enhances flavors and aromas like barbecue style. Cast iron also features non-stick. The high temperature of the pan sears the meat surface. All the flavor, water and nutritional values remain sealed in the food. When cooking in casseroles, the steam generated thanks to the special design of the cover condenses falling back into the food not only retaining flavors and aromas but providing the best protection for nutrients and contributing to a healthy diet. Cast iron is a material 100% recyclable and therefore environmentally friendly. Moreover, thanks to its ability to retain heat for a long time it allows a considerable saving of energy. With closed lid on the table, the pot will preserve the temperature for a second serving. Cast iron retains the heat but as well the cold... can be used to keep the food fresh. Stored for a short time in the refrigerator, keeps food cool during hot summer days, ideal for serving pasta or rice salads, etc. Practical and easy to clean. These cast iron pots and pans are dishwasher safe thanks to the special technology applied to their enameling method. Ergonomic knobs and handles made of cast iron and stainless steel, suitable for use on all heat sources and ovens except microwave. Be careful, they heat up during cooking, it is recommended to handle with a dry thick cloth.

Quando la carne viene posta sulla griglia, il calore accumulato fa sì che i pori si chiudano immediatamente, garantendo così una perdita di succhi e peso molto limitata. When the meat is placed on the grid, the heat stored immediately closes the pores, thus guaranteeing a very poor loss of juice and weight.

In policarbonato, trasparente ed infrangibile. La superficie liscia dell'interno facilita la pulizia. Resistenti alle macchie, non attaccabili dagli acidi dei cibi, da oli o da alcol. Termoresistenti da -40°C a +100°C. Con scala graduata in litri. Impilabili, sono ideali per la conservazione, trasporto ed esposizione.

La griglia sul wok mantiene in caldo il cibo che ha terminato la cottura, mentre l'olio cola nel wok.
The tempura rack attached to the wok holds food that has finished cooking, so that it stays warm while oil drains back into the wok

La tempura è un piatto tipico della cucina giapponese che consiste in un fritto croccante e leggero, fatto di verdure e pesce. Il nome deriva dal termine latino "tempora" che indica quattro periodi dell'anno corrispondenti alle quattro stagioni; in questi frangenti di tempo i cristiani evitavano di mangiare carne, nutrendosi solo di pesce e verdure. Si narra che, durante il XVI secolo, alcuni missionari portoghesi giunsero sino in Giappone e qui fecero conoscere al popolo del Sol Levante la tradizione dei tempura; consuetudine che fu poi personalizzata dai giapponesi che iniziarono a friggere verdure e pesce con una pastella leggera. - The tempura is a typical Japanese dish consisting in fried vegetables and fish, crispy and light. The name of this food comes from the Latin term "tempora" indicating four periods of the year corresponding to the four seasons during which Christians abstain from eating meat, eating only fish and vegetables. The story goes that during the sixteenth century, Portuguese missionaries arrived in Japan and taught the people of the Rising Sun the tradition of tempura. Later on this dish has been customized by the Japanese who began to fry vegetables and fish with a light batter.

Balti e karahi sono lo stesso stile di cucina, originario del Kashmir, dove le pietanze al curry sono realizzate in una padella in ghisa con fondo arrotondato e due maniglie, simile ad un wok cinese. Spezie tipiche utilizzate sono: anice, cardamomo, corteccia di cassia, chiodi di garofano, coriandolo, cumino, finocchio, zenzero e una miscela di spezie chiamata garam masala. Spesso questi pasti vengono consumati senza riso o posate, utilizzando un pane indiano detto naan. - **Balti and karahi are the same style of cooking, originating in Kashmir, where the curries are made in a cast-iron pan with a rounded bottom and two handles, rather like a Chinese wok. Typical spices used in balti curries are aniseed, cardamom, cassia bark, cloves, coriander, cumin, fennel, ginger and the spice blend called garam masala. Balti curries are often eaten without rice or cutlery, using large, flat breads such as naan.**

Queste padelle piane sono utilizzate nella cucina indiana, per focacce e tutto ciò che ha bisogno di cottura rapida ad alta temperatura. L'anatra di Bombay a volte viene cucinata su tawa. CURIOSITA': L'anatra Bombay o bummalo, nonostante il nome, non è una papera, ma bensì un pesce. E' originario delle acque tra Mumbai (ex Bombay) e Kutch nel Mar Arabico. - These flat pans are used in Indian cooking, for chapattis and anything that needs quick cooking at high temperatures. Bombay duck or bummalo is, despite its name, not a duck but a lizardfish. It is native to the waters between Mumbai (formerly Bombay) and Kutch in the Arabian Sea.

COLTELLI SUSHI GIAPPONESI ^P JAPANESE SUSHI KNIVES

Una scelta eccellente per la preparazione di sushi e verdure. Lame in acciaio inox, molibdeno e vanadio, per un'ottimale tenuta del filo, affilatura a rasoio, manici in legno antiscivolo. Secondo la tradizione giapponese l'affilatura è unilaterale ed il filo è molto più sottile rispetto a quello della normale affilatura dei coltelli occidentali. Questo rende i tagli più nitidi ed evita di creare traumi alla trama delicata di carne e pesce crudo. Non utilizzare per il taglio di solidi incluse grosse lisce di pesce. Data la particolarità dell'affilatura e dell'acciaio impiegato si consiglia vivamente di lavare a mano ed asciugare immediatamente con cura le lame.

Excellent choice when preparing sushi and vegetables. Molybdenum/Vanadium s/s blades for excellent edge retention, razor sharp edges, slip resistant wooden handles. The blades are sharpened with the traditional Japanese single bevel to improve sharpness. The large beveled one-sided edge is much thinner than a two-sided edge. This thinner, sharper edge makes for cleaner cuts through the soft flesh of fish, in particular. Using these knives will avoid bruising the delicate texture of raw fish and destroying the freshness of the fish. The thinner edge is more fragile than the edge on western knives. Do not use for cutting anything solid including larger fish bones. Due to the special blade sharpening and s/s used we highly recommend to only hand wash and dry the blades thoroughly immediately.

Affilato e dalla lama pesante usato per dissossare e tagliare il pesce utilizzato nel sushi. È simile ad un coltello da chef. - The Deba is a powerful knife used for filleting fish and butchering meat without bones. Its weight and thickness can chop through fish bones and the sharp edge can fillet even the smallest of fish.

Il coltello Tako Sashimi assomiglia di più ad un coltello occidentale ed è utilizzato per affettare tagli spessi di carne per sushi. Ha la lama senza punta, per evitare di rovinare i tentacoli del polpo. - The Tako Sashimi is a variation of the Yanagi and is used to slice straight-cut sashimi. The blunt tip and balanced weight works well on difficult ingredients like octopus, from which it gets its name. Originated in Kanto (Tokyo) region.

Viene utilizzato per tagliare sottili fette di verdure, carne o pesce, nonché per tagliare in generale a dadi o a fette. Supporti di cottura Silform® specifici per pane, antiaderenti, ideali per panini tondi, hot dogs, panini al latte, per hamburger, baguettes, ecc., ecc. La loro texture perforata ottimizza il trasferimento del calore per una perfetta croccantezza e doratura del prodotto. Si utilizzano indifferentemente su teglie in alluminio o griglie.

Silform® baking sheets are especially studied for breads, non-stick and ideal for a variety of small bread shapes: round, hot-dogs rolls, soft rolls, submarines, hamburger buns, sandwiches, etc., etc. Thanks to their perforated texture, the heat transfer is optimized, allowing unique crunchy and coloration. Can be used indifferently on aluminum baking trays or grids.

SERIE 18000 P

COLTELLI SERIE TRANCIATA
STAMPED KNIVES

La linea di coltelleria professionale "CCS" – Color Coding System riduce i rischi di contaminazione incrociata grazie all'utilizzo di un Sistema di Codifica dei Colori che identifica ogni coltello per un uso specifico e permette di individuare facilmente le diverse aree di lavoro. Gli acciai utilizzati per questa linea di coltelleria presentano un'eccezionale durezza ed elevata resistenza alla corrosione, grazie all'uso del sistema ICE-HARDENING, processo speciale per temprare l'acciaio. Per ogni articolo sono riportati i colori del manico in cui si rende disponibile, nonché le dimensioni delle rispettive lame. Il codice indicato nelle tabelle (es. 18000-16) si riferisce al manico in colore nero. Il codice del manico colorato si ottiene sostituendo il trattino con la lettera corrispondente al colore, da ricercarsi nella legenda. Se ad esempio si vuole ordinare un coltello con il manico rosso, la lettera corrispondente è la "R" e il codice di riferimento il 18000R16.

The professional cutlery line "Color-Line" helps to reduce the risk of cross contamination using a Color Coding System which identifies each knife with a specific task: different food processing areas are easily identified. The steel used for this cutlery line has exceptional hardness and very high resistance to corrosion due to ICE-HARDENED system, a special process to harden the steel. The colors of the handle for each article are indicated, as well as the dimensions of the respective blades. The reference in the descriptions (ex. 18000-16) refers to the handle in black color. The code of the colored handle is given by replacing the hyphen with the corresponding letter of the color, please see the key. For instance if you would like to order a knife with the red handle, the corresponding letter is "R" and the reference is 18000R16.

AFFILATURA

Acciaio e pietra per affilare, due utensili indispensabili per la buona manutenzione dei coltelli. Per ottenere una corretta affilatura, occorre mantenere un angolo costante di 15-20 gradi tra la lama e il mezzo affilante durante l'operazione.

ACCIAINO

L'acciaio serve a correggere e mantenere l'affilatura dei coltelli. Esso riallinea le molecole che compongono il bordo tagliente, che sono state spostate dagli urti continui, "ripristinando" l'affilatura. L'acciaio tradizionale è di forma tonda, molti chefs usano però un acciaio ovale in quanto la forma più larga permette un movimento di affilatura più ampio ed efficiente. L'acciaio diamantato è invece particolarmente efficace per riaffilare coltelli a lama liscia e può ripristinare un filo di un buon coltello con 6 fino a max 10 movimenti.

SHARPENING

Sharpening steel and stone, two indispensable utensils for the knives' good maintenance. To operate a correct sharpening a constant angle of 15°-20° must be kept between the blade and the sharpening utensils during the operation.

SHARPENING STEEL

The sharpening steel is useful to correct and maintain the knives sharpening. It readjusts the molecules that are the basis of the cutting edge, that have been shifted by the usage. The traditional sharpening steel is round shaped, lots of chefs use anyway an oval shaped one, because the larger shape enables a wider and more efficient sharpening movement. The diamond sharpening steel is particularly indicated for knives with plain blade and can renew a good knife's edge with just 6 to a maximum of 10 movements.

PIETRA ABRASIVA

L'affilatura vera e propria si esegue con la pietra abrasiva, composta di solito da ossido di alluminio o da carburo di silicio e deve necessariamente essere immersa in acqua prima dell'utilizzo, per garantire la sua lubrificazione durante l'uso. Esistono differenti tipi di pietra, identificate da livelli di grana diversi (grossa, media, fine), da utilizzare in relazione allo stato della lama: una pietra con grana fine (1000 grit) si utilizzerà per perfezionare l'affilatura, la grana grossa (300 grit) per un coltello che abbia perduto completamente il filo.

Procedimento di affilatura

Posizionare la pietra abrasiva con il suo supporto in gomma antiscivolo sul piano di appoggio.

Scegliere l'angolo di affilatura (per i coltelli da cucina di uso comune 15-20°).

Applicare un movimento continuo, circolare o alternato alla lama sulla pietra, facendo attenzione a mantenere costante l'angolo di affilatura e a mantenere la lama sempre a contatto con la superficie della pietra.

VALORI DI INCLINAZIONE INCLINATION VALUE

Larghezza lama (l) Width (l)	Altezza inclinazione (h) Height of inclination (h)
2 cm	6 mm
4 cm	12 mm
6 cm	18 mm
8 cm	24 mm
10 cm	30 mm
12 cm	26 mm

ABRASIVE STONE

The true sharpening is done using the abrasive stone, usually composed by aluminum oxide or by silicone carbide and must absolutely be rinsed in water before usage in order to guarantee its lubrication during work. There are several types of stone, identified by different grains (coarse, medium, fine) that have to be used according to the blade condition: a stone with fine grain (1000 grit) will be used to improve the sharpening, a coarse grain (300 grit) for a knife that has completely lost the cutting edge.

Sharpening procedure

Placing the abrasive stone with its no-sliding rubber support on the standing surface.

Choose the sharpening angle (for commonly used kitchen knives 15°-20°).

Move the stone on the blade with a continuous, circular or alternate movement, carefully maintaining the same sharpening angle and always keeping the blade in touch with the stone surface.

Il polipropilene è un materiale idoneo per il contatto con sostanze alimentari. Non cede odori e sapori anomali agli alimenti ed è facilmente lavabile e sanificabile dopo il suo utilizzo. I contenitori isotermici sono ideali per proteggere gli alimenti da sollecitazioni di tipo meccanico grazie allo spessore ed alla struttura a cellula chiusa; sono leggeri e privi di sporgenze e spigoli vivi per tutelare la sicurezza degli operatori durante le operazioni di movimentazione e trasporto. Resistenti, igienici, ecologici e riciclabili al 100%, sono compatibili al lavaggio e alla disinfezione industriale con detergenti e disinfettanti, acqua calda e vapore umido fino alla temperatura di 110°C (HAACCP System). Sono idonei a proteggere gli alimenti da sollecitazioni termiche grazie alle proprietà coiberanti del polimero espanso il quale possiede un coefficiente di resistività (Lambda) di 0,039 W/mk e garantisce una caduta termica di 1,5-2,5°C/H/contenitore.

The polypropylene is certified as material suitable for contact with food. It does not hand over odours or flavours to foods and it is easy to wash and disinfect after use. The isothermal containers, entirely made of closed-cell expanded polypropylene, are ideal to protect food from mechanical stresses; they are light and free of protrusions and sharp edges in order to guarantee the operators' safety during handling and transport operations. They are resistant, hygienic, economic, 100% recyclable, suitable for industrial washing and disinfection with detergents and disinfectants, hot water, and wet vapour up to a temperature of 110°C (HACCP System). These containers are suitable to protect food thermal stresses thanks to the insulating properties of the expanded polymer which has a resistivity coefficient (Lambda) of 0.039 W/mk and guarantees a thermal loss of 1.5-2.5°C/H/container.

BONE CHINA N

Arthur Krupp®
B O N E C H I N A

La professionalità Arthur Krupp e la raffinatezza della fine bone china riunite in una collezione fresca e candida. Neve deve la propria elegante purezza alla semplicità e alla morbidezza delle sue linee, in equilibrio tra le ampie falde di piatti e coppe e la rotondità dell'assortita caffetteria. La qualità, la trasparenza e lo spessore degli articoli concorrono a esaltare preparazioni culinarie di esigenti chef e a contraddistinguere buffet per eleganza e praticità, grazie anche all'impilabilità dei suoi pezzi.

Arthur Krupp's professionalism and the charm of fine bone china creates a fresh and pure collection. Neve's elegant and simple lines provide a soft balance between the wide-rimmed plates and bowls and the roundness of the coffee ware. The quality, transparency and thickness of the articles exalt culinary preparations of demanding chefs and help buffets stand out, thanks to the stackable pieces.

POSATERIA - *FLATWARE*

VINTAGE

VINTAGE ON 18/10 STAINLESS STEEL

L'attraente superficie "Vintage" è un omaggio ai grandi classici e progetti iconici di design di Sambonet. Si tratta di una particolare lavorazione meccanica di finitura di massa del substrato delle posate in acciaio inox. Mediante una serie di processi industriali di natura abrasiva le superfici assumono una inedita resa, un effetto volutamente "usurato", che introduce un nuovo ed affascinante gusto in tavola e di tendenza per l'interior design contemporaneo.

The captivating "Vintage" collection is a tribute to Sambonet's great s and iconic design projects. It uses a special craftsman finishing technique on the surface of the stainless steel flatware. Through a series of industrial scraping processes, surfaces assume an original and intentionally "worn out" effect, introducing a new and fascinating ambience at the table and a new trend for contemporary interior design.

VINTAGE PVD

VINTAGE ON PVD 18/10 STAINLESS STEEL

Texture e colore possono essere combinate tra loro, per ricercare anche in tavola il proprio stile. In questi casi i processi si articolano in più fasi produttive che si susseguono partendo dalla lavorazione con le differenti tecniche abrasive dello strato superficiale per poi passare alla sua colorazione. Il mix tra queste due lavorazioni dona così inediti effetti alle collezioni.

Texture and colour can be combined together, in order to find a personal style on the tabletop. In this case the processes take place in consecutive phases, from the different abrasive techniques to the colouring ones. Combining these two treatments, flatware assume original effects.

PVD

PVD ON 18/10 STAINLESS STEEL

Il PVD è un processo che conferisce agli oggetti pregiate colorazioni e sfumature, ed è ottenuto dalla deposizione di particelle metalliche mediante vaporizzazione in una camera sottovuoto. Questo particolare rivestimento si salda a livello atomico al substrato in acciaio inox delle posate, dotando il materiale di maggiore durezza e di resistenza sia all'usura per sfregamento che alla corrosione, inibendo la formazione di ruggini o ossidi. Un processo che dà vita alle esclusive colorazioni Black, Copper, Gold e Champagne.

PVD is a technique which colors and shades valuable objects by evaporating metal particles in a vacuum chamber. This special treatment is welded at an atomic level to the surface of the stainless steel flatware, hardening the steel and optimizing its resistance to both rubbing and corrosion, as well as preventing rust and oxides from forming. A process that generates the Black, Copper, Gold and Champagne exclusive colours.

ANTIQUE PVD

ANTIQUE ON PVD 18/10 STAINLESS STEEL

Il particolarissimo effetto "Antique" si caratterizza per una sottile texture piacevole al tatto e, nel contempo, per l'inedita resa opaca che assume l'acciaio. La finitura è il risultato di un trattamento di sabbatura ad alta pressione mediante microparticelle in ceramica, che definisce l'effetto finale delle superfici. Texture e colore possono essere combinate tra loro, per ricercare anche in tavola il proprio stile. In questi casi i processi si articolano in più fasi produttive che si susseguono partendo dalla lavorazione con le differenti tecniche abrasive dello strato superficiale per poi passare alla sua colorazione. Il mix tra queste due lavorazioni dona così inediti effetti alle collezioni.

The particular "Antique" finishing is characterized by the pleasant to touch texture and the original matt appearance of the stainless steel. This finish is the result of an high pressure ceramics sandblasting treatment, made up of micro ceramic particles, which defines the final effect of the surfaces. Texture and colour can be combined together, in order to find a personal style on the tabletop. In this case the processes take place in consecutive phases, from the different abrasive techniques to the colouring ones. Combining these two treatments, flatware assume original effects.

MACINE
MILLS

MECCANISMI - MECHANISMS

PEPE - PEPPER

Il meccanismo è dotato di una doppia fila di denti elicoidali che catturano il grano, lo spingono verso il basso e lo bloccano per macinarlo perfettamente. Subisce un trattamento brevettato che protegge l'acciaio dalla corrosione pur mantenendo la sua affilatura e resistenza all'usura. Per ottenere i migliori risultati, si consiglia di utilizzare solo pepe in grani secchi da 5 mm o meno di diametro. Si possono macinare pepe verde, nero, e bianco. Le bacche rosse possono essere macinate solo se miscelate (max 15%) con altri grani di pepe. Semi di coriandolo secchi sono anch'essi adatti per il meccanismo macina pepe.

The pepper mechanism is equipped with a helix-shaped double row of teeth that guide and hold the peppercorns for a perfect grind. It has a patented treatment that protects the steel from corrosion while maintaining its sharpness and wear resistance. To get the best out of your Peugeot pepper grinding mechanism, we recommend to use peppercorns with a diameter of 5 mm (1/4") or less. Black, white and dry green peppercorns can be ground in Peugeot pepper mills. The pink berries can be ground only if in a blend (max 15% pink) with one of these other peppercorns. Dried coriander is also suitable for the pepper mechanism.

SALE - SALT

Il meccanismo per il sale Peugeot è disegnato per macinare sale marino grosso. Realizzato in acciaio inossidabile resiste alla corrosione provocata dal sale asciutto. Non usare con pepe ed altre spezie, con sale di mare umido o con fiore di sale (Guérande, Ré, Malton, sel rose...). Per ottimizzare la resa del meccanismo si consiglia di utilizzare sale con un diametro di 4 mm.

The Peugeot salt mechanism is designed to grind cooking salt. It is made of stainless steel and is not sensitive to salt corrosion. To get the best out of your Peugeot salt grinding mechanism, you should use: salt with a diameter of 4 mm (3/16") or dry coarse salt: dry sea salt or rock salt. Do not use for pepper or any other spice. Do not use with wet sea salt or flowers of salt, Guérande, Ré, Maldon, pink salt, etc.

SALE UMIDO - WET SEA SALT

Un innovativo sistema brevettato appositamente progettato per sale marino bagnato la cui consistenza naturale ed il contenuto di umidità non permettono l'uso di un comune macinasale. Il meccanismo assicura un'ottima macina, un'uscita costante, e una spirale che mescola il sale affinché non si attacchi. Esclusivo meccanismo di ceramica, Made in France.

A specially designed mill for wet sea salt. The natural consistency and moisture content do not allow the use of an ordinary salt mill. Innovative patented system for a high-performance grind without blockage even with very humid or compressed salt. This specific mechanism is composed of 3 stops ensuring both mechanism resistance and constant output, and an anti-clogging spiral which shuffles the salt in the reservoir. Peugeot ceramic exclusive mechanism, Made in France.

PEPERONCINO - CHILI PEPPER

Questo meccanismo è un prodotto esclusivo Peugeot. Il modello brevettato ha un sistema di pre-taglio e un meccanismo che permettono di macinare il peperoncino essiccato. Come il macinapepe, il meccanismo subisce un trattamento brevettato che protegge l'acciaio dalla corrosione pur mantenendo la sua affilatura e resistenza all'usura.

The chili pepper mechanism is a Peugeot exclusive product. This patented model has a pre-cutting system and a mechanism that grinds dry chili pepper. Like the pepper grinder it has a patented treatment that protects the steel from corrosion while maintaining its sharpness and wear resistance.

NOCE MOSCATA - NUTMEG

La macina è dotata di una doppia lama per grattugiare in acciaio inox e di un robusto dischetto uncinato che permette di grattugiare l'intera noce molto finemente.

The Peugeot nutmeg mill is equipped with a double stainless steel blade/grater and a strong claw which enables the nutmeg to be very finely ground.

IMPOSTAZIONE DELLA MACINA - ADJUSTABLE GRINDING SYSTEM

PER MACINE MANUALI ED ELETTRICHE - FOR ELECTRIC OR MANUAL MILLS

Sistema brevettato che permette una regolazione predefinita della macinatura. 6 Livelli per il pepe e 6 Livelli per il sale. Facile: basta ruotare l'anello alla base della macina e selezionare una delle posizioni, ognuna corrisponde ad una determinata grana.

Patented system that enables precise grind adjustment settings. 6 pre-defined levels of grind for pepper and 6 for salt. Easy: just rotate the ring at the base of the mill and select one of the positions, each corresponding to a specific grain.

REGOLAZIONE CLASSICA - CLASSIC ADJUSTABLE SYSTEM

Negli apparecchi elettrici la rotella di regolazione si trova sotto il meccanismo di macinatura. Negli apparecchi manuali la regolazione si effettua ruotando il dado/pomolino. Ruotare in senso orario per ottenere una macinatura più fine, in senso antiorario per ottenere una macinatura più grossa.

Thumbwheel grind adjustment on electric grinders is found below the grinding mechanism. Grind adjustment nut on manual mills, turn the nut. Clockwise to obtain a finer grind, counter-clockwise to obtain a coarser grind.

Incl.: guarnizione per setaccio in silicone, setaccio inox, tubo di ventilazione inox, tubo di silicone, scovolino. - Contains: sieve gasket 100% silicone, stainless steel internal sieve, s/s ventilation tube, silicone tube, cleaning brush.

Il kit di infusione rapida permette di infondere un liquido con sapori diversi in tempo rapido. Unire gli aromi solidi (erbe, spezie, frutta, ecc.) con il liquido [alcool, olio, acqua, aceto, ecc.] nel sifone ed immettere una carica per panna (art. 41455-AA). Il sapore degli aromi solidi viene infuso nel liquido, che sviluppa così un gusto unico. - Rapid Infusion enables a liquid to be infused with different flavors in the shortest possible time. First, combine aromatic solids (e.g. herbs, spices, fruit) and a liquid (e.g. alcohol, oil, water, vinegar) in the Whipper. By applying pressure into the Whipper using a cream charger (#41455-AA), the flavor of the solids becomes infused into the liquid, which develops a unique taste.

Frame BuffetSystem

by Michael Sieger / sieger design

Gli elementi che compongono il sistema sono modulari, rendendo la composizione estremamente versatile. La natura impilabile di ogni elemento consente uno stoccaggio efficiente, ottimizzando lo spazio. Le strutture porta ciotole sono impilabili sia senza che con le ciotole. Tutti gli elementi del sistema sono veloci e semplici da utilizzare, facili da impugnare sotto gli inserti (tagliere, inserto porta ciotole, vassoi, ecc.) come pure sotto la base dei moduli stessi anche quando sono impilati. Le strutture in acciaio inox ad esempio possono essere utilizzate anche senza inserti come letto per contenere ghiaccio per la presentazione di composizioni di frutti di mare o altri alimenti. Le strutture porta ciotole in acciaio inox sono costruite con una doppia parete permettendo al cibo di mantenere la temperatura più a lungo.

The system elements feature a modular construction, making them extremely versatile. The stackable nature of every element enables space-efficient storage. Bowl boxes can even be stacked with or without bowls. All the system elements are quick and simple to use, with easy to grip edges both underneath the cover panels and underneath the base modules themselves. Cool plates can be used without modular cover panels for a bed of crushed ice. Stainless steel bowl boxes are not only attractive but also insulated, allowing food to maintain its temperature for longer.

BIGNE' - PUFFS - WINDBEUTEL - CHOUX - BOLLOS

Supporto alveolare Silform® per cottura di pasta bigné.
Questa gamma è stata sviluppata in particolare per la pasta di bigné. Grazie alle impronte preformate, preparare bigné uguali e regolari diventa facile. Non è più indispensabile né spennellare con tuorlo né forare la pasta. Grazie alle proprietà antiaderenti del Silform®, l'estrazione è impeccabile. La base del bigné sarà chiara e netta conferendogli così una perfetta stabilità. Silform® for Choux Pastry.

This range has been developed especially for cream puffs dough. The pre-formed shapes make easy obtaining perfect, regular and same size cream puffs. Neither greasing the sheet nor spiking the dough is required before baking. The non-stick property of the material allows an easy and perfect extraction of the pastries. The base of the puff will be clear and plain for perfect stability.
