Chi siamo

1

Argenesi nasce dal desiderio di voler coniugare l'antica passione per "quel metallo di luna capace di riflettere la luce" con l'affidabilità e velocità che la produzione moderna offre oggi. Mediante l'innovativa tecnologia SilvanSputteringAg, realizziamo oggetti in vetro, cristallo, ceramica, porcellana e altri materiali resi preziosi dal rivestimento molecolare permanente di puro argento 999.

About us

Argenesi stems from the desire to combine an ancient passion for "that lunar material capable of reflecting the light" with the reliability and speed that modern production can offer today. Thanks to the innovative SilvanSputteringAg technology, we create objects made of glass, crystal, ceramic, porcelain and other materials enhanced by permanent molecular plating with 999 pure silver.

2

La Tecnologia

Grazie alla tecnologia SilvanSputteringAg, mediante un procedimento PVD è possibile rivestire qualsiasi tipo di superficie. Oltre ad avere caratteristiche di durevolezza e resistenza all'abrasione notevoli nel tempo, le lavorazioni effettuate con la tecnologia SilvanSputteringAg permettono di conciliare elegantemente materiali preziosi con altri tipi di prodotti, anche variopinti, senza "nasconderne" la naturale bellezza.

Technology

Thanks to SilvanSputteringAg technology, using a PVD procedure, it is possible to plate any kind of surface. Besides being considerably long-lasting and resistant to abrasion over time, processes carried out with SilvanSputteringAg technology elegantly bring together precious materials with other types of products, even the most colourful, without "hiding" their natural beauty.

Gift & Living

Le nostre Collezioni offrono prodotti di elevata qualità, le cui caratteristiche principali sono il design ricercato, la lucentezza inalterata nel tempo delle superfici trattate e l'alchimia perfetta nella combinazione dei materiali utilizzati.

Our collections offer high quality products. The main features are the refined design, the unaltered shine of the treated surfaces over time and the perfect alchemy in the combination of integrated materials.

C
